MICROCHIPPING IN THE U.K.

BEING AWARE OF BEHAVIOUR

Microchipping can be worrying for dogs, so we need to take precautions to make it positive.

Positive Experience:

- Experienced Practitioner
- Allow the puppy to explore the surroundings
- Do the procedure on the floor if the dog is not used to the table
- Handle gently – STOP if see licking lips or shifting of weight
- Practice handling at home

GIVE THE DOG SOMETHING TASTY DURING THE PROCEDURE

My dog was very worried at the vets or during procedures?
